

## STATE OF TENNESSEE **DEPARTMENT OF HEALTH**

## Immunization Documentation for New Full-Time Students in a Tennessee Higher Education Institution

This may be used to provide a record that a new student has met the requirement of the Tennessee Department of Health (Rules Chapter 1200-14-1-.29) for immunity to measles, mumps, rubella and/or varicella (chickenpox), when a specific institution's form is not available. This must be signed by a qualified healthcare provider (physician, advanced practice nurse, physician assistant, or public health nurse of a Tennessee public health department). Distance learning (e.g., online) and part-time students are exempt from state requirements. This <u>does not</u> address hepatitis B vaccination required by the state for students involved in patient care as part of training for a healthcare profession.

Students may be subject to additional institutional immunization requirements. Students should address questions about institutional requirements or religious exemption policies to the institution.

nt Na	ame: Date of birth (/_//
Mea	asles, Mumps, Rubella (Check one. If indicating vaccination or serology, dates required
Ħ	Born before 1957, therefore presumed immune through past illness or
Ħ	2 doses of measles, mumps, rubella vaccines (no earlier than 4 days before 1st birthday, >28 days apa
	Dates:/ and/, or
Ħ	Serology (IgG) positive for measles and mumps and rubella: Year, or
Ħ	Medical exemption (vaccination is contraindicated because of an excess risk of harm)
Ħ	Incomplete. One dose of vaccine given/, next dose due after//_
Ħ	Status not assessed at this visit (check if student only needs varicella documentation on this form)
<u>Var</u>	icella or "chickenpox" (Check one. If indicating vaccination or serology, dates require
Ħ	Born before 1980, therefore presumed immune through past illness <i>or</i>
Ħ	The healthcare provider named below believes the student has had chickenpox:
	Year of illness (optional):, or
Ħ	2 doses of varicella vaccine (given no earlier than 4 days before 1st birthday, ≥28 days apart)
	Dates:/ and/, or
Ħ	Serology (IgG) positive for varicella: Year, or
Ħ	Medical exemption (vaccination is contraindicated because of an excess risk of harm)
Ħ	Incomplete. One dose of vaccine given/, next dose due after//_
Ħ	Status not assessed at this visit (check if student only needs MMR documentation on this form)
